Research interests

I am a cosmologist working at the interface between instrumentation and data analysis. I work on the search for the primordial B-modes signal in CMB polarisation, a smoking gun for cosmic inflation. My focus is on calibration and systematics in the context of analysis of multi-frequency, multi-component data sets. I have 5+ years of experience working on CMB experiments, from receiver characterisation to low- and high-level data analysis and simulations of instrumental systematic effects.

Education & Academic appointments

Current position.....

Center for Astrophysics | Harvard & Smithsonian 2020 – present
Harvard Postdoctoral Fellow

Education.....

Université Paris Cité 2017 – 2020

PhD in Cosmology

Dissertation: *Searching for cosmological B-modes in the presence of astrophysical contaminants and instrumental effects*, with Radek Stompor and Josquin Errard at AstroParticle and Cosmology laboratory

ISAE-Supaéro & Université Paul Sabatier 2016 – 2017

M.S. – Double degree in Astrophysics and Aerospace Engineering

Master thesis: *Novel readout electronics for CMB experiments*, with Matt Dobbs at McGill University

École polytechnique 2013 – 2016

B.S.(Physics) & M.S. (Astrophysics)

Senior thesis: *Looking for SZ effect in ALMA data*, with Paola Andreani at European Southern Observatory

Lycée Henri IV 2011 – 2013

B.S. (years 1 & 2) – Mathematics, Physics & Chemistry

Two-year intensive preparation for national competitive entrance exams to French top engineering schools

Professional service

Collaboration membership.....

CMB-Stage 4 2021 – present

Small Aperture Telescopes (SATs) and Systematics working groups

BICEP/Keck 2020 – present

Calibration & Systematics lead

POLARBEAR/Simons Array, Simons Observatory 2017 – 2020

Low-ell BB and Systematics working groups

Leadership & Representation

Harvard CMB group meeting	2021 – present
<i>Organisation of weekly meetings with local and invited speakers</i>	
La Sphinx	2017 – present
<i>École polytechnique alumni group with a focus on social and environmental issues</i>	
Université Paris Cité – Physics Department Board	2018 – 2020
<i>Student elected representative</i>	
APC Laboratory – Cosmology Journal Club	2018 – 2020
<i>Organisation of bi-weekly meetings</i>	

Mentoring, Teaching & Outreach

Mentoring

- Annie Polish, graduate student (Harvard University), 2022 – present
- Brodi Elwood, graduate student (Harvard University), 2022 – present
- Will Golay, NSF REU intern (University of Iowa), 2022 – present
- Christos Giannakopoulos, PhD candidate (University of Cincinnati), 2021 – present
- James Cornelison, PhD candidate (Harvard University), 2020 – present
- Maroua Benhatchi, junior thesis student (Université Paris Cité), 2019

Teaching

- Qualification for holding entry-level professor positions in France issued by the French Ministry of Higher Education and Research (*Qualification aux fonctions de Maître de Conférence*), based on teaching record and teaching statement, issued 2021
- Physics for pre-med students, Université Paris Cité, 2019
- Computer Science 101, Université Paris Cité, 2019
- Private tutor for high-school students from underprivileged background, 2015 – 2020

Outreach

- CMB-Stage 4 Saturday Space Science Series, 2022
- Skype a Scientist, 2022
- An Evening in Science, Loomis Chaffee School, 2022
- Physics content editor for *Fête le Savoir!* (science outreach for all ages), 2017 – present
- Camp counsellor for *Universciel* (astronomy outreach for children), 2018 – 2020
- Board member of *SpaceUp France*, 2016 – 2018
- Building a portable cloud chamber for science fairs, École polytechnique, 2014 – 2015

Talks

Invited talks & Seminars

- *Cosmology Talks Mini-workshop on parity violation* – Guest expert, online, November 2022
- *Beam calibration and systematics: from BICEP/Keck to future CMB experiments* – Kavli IPMU, July 2022

- *Updated Constraints on Primordial Gravitational Waves using Planck, WMAP, and BICEP/Keck Observations through the 2018 Observing Season* – Center for Astrophysics, April 2022
- *New Constraints on Primordial Gravitational Waves using Planck, WMAP, and BICEP/Keck Observations through the 2018 Observing Season* – CMB France Workshop, Institut d’Astrophysique de Paris, November 2021
- *Impact of instrumental systematic effects on component separation and large scale B-modes measurements* – CMB Calibration and systematics focus workshop, Kavli IPMU, December 2020
- *A framework for performance forecasting of the parametric component separation in the presence of systematic effects* – LiteBIRD France Day, June 2020
- *Probing Universe’s first light: Looking for inflation with the new generation of CMB polarisation experiments* – ESO, June 2020

Contributed talks.....

- *Beam calibration campaign requirements to control temperature-to-polarisation leakage for CMB-Stage 4* – From Planck to the future of the CMB, INFN Ferrara, May 2022
- *A framework for performance forecasting of the parametric component separation in the presence of systematic effects* – B-modes from Space workshop, MPA, December 2019
- *Instrumental systematic effects for the new generation of CMB polarisation experiments* – Young French Physicists annual meeting, organised by the French Physics Society (SFP), Collège de France, November 2018

Posters.....

- *New Algorithms for Characterizing the Beams of Next-Generation CMB Experiments* (with Will Golay) – AAS Winter Meeting, January 2023 (submitted)
- *Control of beam systematics and temperature-to-polarisation leakage: From BICEP/Keck demonstrated performance to forecasts for CMB-S4* – Rencontres de Moriond, January 2022
- *Latest results, current data-analysis and upcoming upgrades of the POLARBEAR experiment* – CosmoGold IAP 2019 : The golden age of cosmology from Planck to Euclid, June 2019
